

HCP

Technical Services

From getting the product to your tanks to keeping your teams well trained, these are the services we bring to your operation across supply, quality, operations and training.

WHAT THIS BROCHURE COVERS

The technical services catalogue

At HCP, we offer a comprehensive suite of technical services, including supply logistics, product quality assurance, extensive training programmes, operations management, and ongoing operational support. Our industry-leading training portal and HSSE management systems ensure that your team is equipped with the latest knowledge and best practices. The company brochure carries our vision, standards, clients and industry representation; this document sets out each service in turn.

Supply, quality and training

01 Supply logistics

We manage the entire supply chain logistics for your aviation fuel, ensuring a smooth, efficient, and timely delivery from source to destination.

02 Receipt — marine, bridger, rail, barge

We handle the receipt of aviation fuel through various modes of transport, including marine, bridger, rail, and barge, ensuring safe and efficient transfer to your storage facilities.

03 Product quality

We prioritise the quality of aviation fuel, implementing rigorous quality control measures to ensure that the fuel meets all industry standards and specifications.

04 Training

We offer comprehensive training programmes covering various industry standards such as Defstan 91-091, HM50, EI 1530, JIG 1, JIG 2, JIG 4, and other relevant EI aviation standards. Our training ensures your team is well-equipped to handle all aspects of aviation fuel management.

Operations, efficiency and safety

05 Operations

We manage the day-to-day operations of your aviation fuel systems, ensuring they run smoothly and efficiently.

06 Forecasting, fuelling efficiency, vehicle requirements

We provide forecasting services to help you anticipate future fuel needs. We also focus on improving fuelling efficiency and determining vehicle requirements to optimise your operations.

07 Industry-leading training portal

Our online training portal provides easy access to a wealth of knowledge and resources, helping your team stay up to date with the latest industry standards and best practices.

08 HSSE management systems

We implement Health, Safety, Security, and Environment (HSSE) management systems to ensure your operations are safe, secure, and environmentally friendly.

Control, competency and support

09	Work control procedures We establish and enforce work control procedures to ensure your operations are carried out efficiently, safely, and in compliance with all regulations.	
10	Maintenance training We provide maintenance training to ensure your team can effectively maintain and troubleshoot your aviation fuel systems.	
11	Ongoing operational support We offer ongoing support to ensure your operations run smoothly. Our team is always ready to assist with any issues or challenges you may face.	
12	Vehicle commissioning We manage the commissioning of your fuelling vehicles, ensuring they are fully functional, safe, and ready for operation. This includes testing all components and training your team on vehicle operation and maintenance.	

STANDARDS WE TRAIN AND OPERATE TO

Every programme is written against a published standard

HCP adheres to and complies with industry standards and regulatory frameworks to ensure safe, legal, and efficient operations. Compliance with API and ASTM International standards ensures fuel quality, handling, and distribution integrity. JIG and IATA guidelines establish best practices for aviation fuel management and operational safety.

Adherence to NFPA and IEC standards ensures fire protection and electrical safety in hazardous environments. Regulatory compliance with EPA and OISD guarantees environmental responsibility and occupational safety. Alignment with BSI, ANSI, and ISO standards enhances operational consistency and global credibility.

 ANSI American National Standards Institute	 API American Petroleum Institute	 ASTM ASTM International
 BSI British Standards Institution	 EI Energy Institute	 EPA Environmental Protection Agency
 IATA International Air Transport Association	 IEC International Electrotechnical Commission	 ISO International Organization for Standardization
 JIG Joint Inspection Group	 NFPA National Fire Protection Association	 OISD Oil Industry Safety Directorate

Training covers Defstan 91-091, HM50, EI 1530, JIG 1, JIG 2, JIG 4, the JIG HSSE Management System Standard and other relevant EI aviation standards. Marks remain the property of their owners.

HCP IN BRIEF

Who you are working with

Hansaconsult Projects DWC LLC (HCP) specialises in aviation fuel infrastructure, product quality assurance and fuel facility operations. Our team holds current aviation fuel qualifications and includes senior JIG Inspectors who have delivered design reviews, construction supervision, commissioning support and JIG/EI 1530 inspections at depots and airports worldwide.

Risk and compliance

Operational governance and project management that keep you inside the standards.

Sustainability

Leak detection, asset life extension and SAF-ready infrastructure.

Operations and maintenance efficiency

Proactive maintenance strategies and hands-on support that reduce downtime.

Capital efficiency

Engineering judgement applied at every stage of the project life cycle.

THE HCP TEAM ARE REPRESENTATIVES ON

The API inspectors group, Energy Institute aviation committees, the IATA Technical Fuels Group, the Joint Inspection Operations and PQ Committees, and Defence Standards 91-091 and 91-090. Full detail in the HCP company brochure.

CONTACT

Tell us where your operation is under pressure

Every operation runs to its own rhythm and constraints, so we start by listening. Tell us where the pressure is felt and what good would look like, and we will talk it through with you, share what we have learned on similar operations and agree the right way forward together.
